

# VOLCANOES

I hadn't planned to do the volcano activity, because I feel like we do it all the time, and I thought everyone would be bored of it, but talking about the plates, and the earth's crust and the mantle inevitably led onto it, it doesn't matter how many times we do this one, everyone always loves it, and it's nice to have an activity where Rafiki gets to pour and measure on his own, experimenting with what combination makes the most bubbles.

Plus it's so quick and easy to set up.

So

Get some small containers. I used the ones that we normally make ice lollies in.

Put 1 teaspoon of bicarbonate of soda in there.

Add a dash of washing up liquid (or in Rafiki's case, about a 3rd of the cup).

Then pour in a little bit of vinegar and watch the eruption flow.
